CargoWise™ edi Forms Strategic Alliance with Descartes Global Logistics Network

ediEnterprise Platform Integration Provides Systems Enhancements for Customers

Chicago, IL USA, October 29, 2007 — CargoWise™ edi, a leading provider of integrated international supply chain logistics management systems, announced it has formed a strategic alliance with the Descartes Global Logistics Network (GLN). The alliance offers increased management capabilities and increased visibility to global supply chains for logistics service providers and their customers.

The Descartes GLN is a multimodal network of transportation providers and customers that facilitates the interchange of logistics information and provides services that leverage information for customer solutions to the supply chain management process. The Descartes GLN helps companies better manage their logistics shipment management processes, track inventory, meet regulatory requirements, optimize fleet performance and effectively communicate with their logistics partners.

CargoWise's *ediEnterprise* system is a highly modular enterprise-class system designed to automate and streamline the operations and management of engaged forwarding, customs brokerage, contract warehousing and international logistics providers. In doing so, it supports and automates the highly fragmented logistics process that is used by logistics providers worldwide. *ediEnterprise* draws all of these disparate data processes together to provide operators with instant access to real-time information that enables management to have transparent oversight of global operations at all times.

Through this strategic alliance, CargoWise's *ediEnterprise* integration with Descartes GLN offers customers additional enhancements such as:

- Carrier booking and statuses
- Ocean Automated Manifest System (AMS)
- Connections with trading partners

This single connection now offers forwarders using CargoWise *ediEnterprise* software enhanced operating efficiencies through status messaging versus the timely process of manually tracking freight, and it also offers a greater quality of service in more accurate and timely tracking versus manual tracking. While *ediEnterprise* is known for its extensive information exchange capabilities, Descartes offers users a single connection with message translation in hundreds of message formats.

"Our focus is providing our customers with comprehensive solutions to interact seamlessly with their extended networks of partners and suppliers," said Scott Sangster, Vice President, Global Logistics Network at Descartes. "Our partnership with Cargowise edi extends the ability for organizations and their trading partners to facilitate the interchange of logistics information, streamline shipping operations and standardize business processes."

"We are continually updating and improving our products to bring greater supply chain visibility to our customers," said Cris Arens, Global Sales Director of CargoWise edi. "This alliance brings value added service capabilities to our *ediEnterprise* module that will benefit our customers and bring greater efficiency to their supply chains on a global basis."

ABOUT CARGOWISE™ EDI

CargoWise edi provides solutions for international logistics providers, focused on supply chain execution capability in an integrated ERP-like globally capable system. It is a world-leading provider of high value software solutions and services for the freight forwarding, NVOCC, customs brokerage, warehouse, container freight station, ships agency, cartage and trucking industries.

With more than 1,000 clients and 25,000 users in 40 countries, CargoWise edi offers supply chain logistics management systems that provide full integration across all management departments for clients throughout the globe. The Company also maintains offices in the U.S., Europe and Asia. More information on CargoWise edi can be found here: www.cargowise.com.

ABOUT DESCARTES

Descartes (TSX: DSG) (NASDAQ: DSGX), a leading provider of software-as-a-service (SaaS) logistics solutions, is delivering results across the globe today for organizations that operate logistics-intensive businesses. Descartes' logistics management solutions combine a multi-modal network, the Descartes Global Logistics Network, with component-based 'nano' sized applications to provide messaging services between logistics trading partners, "book-to-bill" services for contract carriers and private fleet management services for organizations of all sizes. These solutions and services help Descartes' customers reduce administrative costs, billing cycles, fleet size, contract carrier costs, and mileage driven and improve pick up and delivery reliability. Our hosted, transactional and packaged solutions deliver repeatable, measurable results and fast time-to-value. Descartes customers include an estimated 1,600 ground carriers and more than 90 airlines, 30 ocean carriers, 900 freight forwarders and third-party providers of logistics services, and hundreds of manufacturers, retailers, distributors, private fleet owners and regulatory agencies. The company has over 300 employees and is based in Waterloo, Ontario, with operations in Atlanta, Pittsburgh, Ottawa, Washington DC, Derby, Stockholm, Shanghai, Singapore and Melbourne.
