CargoWise edi Releases MAF eBACCa Messaging Module

Auckland, NZ, April 8, 2009 — CargoWise® edi, a leading provider of integrated international supply chain logistics management systems, announced that it has released its new electronic Biosecurity Authority/Clearance Certificate (BACC) messaging module for its flagship software suite, *ediEnterprise*. This module will provide *ediEnterprise* customers with the ability to interface with the New Zealand Ministry of Agriculture and Forestry (MAF) system, whereby customers can lodge a request for a BACC electronically rather than manually faxing the request to MAF. The new system is known as *eBACCa*, or the Electronic BACC Application. The new *eBACCa* messaging system implements online document download, registration and testing with 24x7 technical support, thus reducing paperwork and increasing supply chain transparency by enabling users to send and receive BACC applications electronically. Prior to the implementation of this new system, all applications were submitted by fax, generating more than 1.3 million pieces of paper per year, with much of the data rekeyed by staff, often creating redundancies and delays in processing.

In making the announcement, Brett Wilton, Business Development Manager – New Zealand for CargoWise edi said: “*ediEnterprise* has been enhanced with the creation of this new module that accesses the information from our current brokerage module, combines it with additional required documentation fields on the new ‘*eBACCa*’ tabs, attaches copies of PDF documents that can be selected from the *eDocs* tab and then sends the request to MAF via ECN electronically. When MAF has processed the *eBACCa* and is satisfied the clearance requirements have been met, they email back a completed BACC form in PDF format so that the goods can be released, greatly enhancing the documentation process while creating paper-free efficiencies. We are very pleased to offer our customers this new electronic documentation messaging module through *ediEnterprise*.”

ABOUT CARGOWISE® EDI

CargoWise edi provides solutions for forwarders, customs brokers and logistics service providers focused on supply chain execution capability in an integrated ERP-like globally capable system. It is a world-leading provider of low-cost, high-value software solutions and services for the freight forwarding, NVOCC, express courier, customs brokerage, contract warehouse, container freight station, ships agency, local cartage and other supply chain services.

Every day, 1,300 logistics service providers, consisting of 33,000 users in 45 countries, move goods through the global supply chain using CargoWise edi's flagship product *ediEnterprise*. CargoWise edi offers supply chain logistics management systems that provide full integration across all departments and functionality for domestic, regional and global customers.
